Carol,
As long as I'm copied on the request/correspondence, I don't have a problem. My contractor and I will discuss prior to taking any action.
Lora

Hi Lora. I just got back from vacation today and I have been reviewing my emails. When you have the chance, please confirm whether you are comfortable with EPA contacting your contractor (EnSafe/Resolution) directly with this inquiry.

Thanks,
Carol

Not an issue, she's on cc list as is NYSDEC.

No objections

Regards

Rob

Hi Rob - I am going through my emails after a week away from the office. I notice that you are making a direct inquiry to the Navy's contractor for information. Have you received Lora Fly's concurrence to do this?

Hello Brian,

Thank you again for sharing your thoughts as to alternatives for enabling agencies to access the hydrogeologic data being collected through the drilling program in Nassau. The geocollector database seems a more straightforward method, and may be a better approach than setting up NIRIS accounts.

My inquiry was not a "rush" and certainly continue to enter your 2016 data as planned. Then we can schedule a call to walk through the features of the geocollector and set up access contacts with USGS and EPA.

Regards

Rob Alvey

Subject: RE: Navy - Bethpage VPB log web database access NIRIS

Hi Rob -

Hope all is well. Yes, access into NIRIS will require some effort. Our geocollector database may be the best option for what you require. We are in the process of entering the 2016 data - it may be a couple of weeks before that is completed. I suggest we wait until that is complete, and then I can assign an individual from each agency a username and password, and we can have a call where I can walk you through the features of the database.

In the meantime, if you need any specific reports, I can forward those to you.

Subject: RE: Navy - Bethpage VPB log web database access NIRIS

Hello Brian

Thank you for the offer to try to walk us through updating the vertical profile boring logs that you've been productive doing the last couple of years. I realized we never had a full set of the boring logs, locational data or geophysical logs or easy means of getting it into our GIS data files. The geocollector database may be easier than NIRIS. I recall I'd tried that route a few years ago..even

getting a PO approved to enable set up, but alas, our own security system kept blowing it up. We've upgraded, but I doubt I can even attempt a new PO for IRIS, and our GIS expert, Bob as well as USGS can both may be better at getting it.

I somehow think USEPA and NYSDEC no longer have easily compatible Equis systems and not interested in trying to keep up with that.

Wednesday Feb 1 may be best . Would 11 AM work? If so, perhaps you can set up a call in number since you are our gracious host.

Rob

Hi Rob -

Can do. We have the geo logs and VPB gamma/TCE plots all on NIRIS, and Carol should have all of the validated Form 1's and finalized reports. We do have a Geocollector database as well, which requires you to download and access through a GIS application. I'd be glad to walk you through that access portal.

Subject: Navy - Bethpage VPB log web database access

Hello Brian,

Hope all is going well for 2017! I've been busy of other projects, and apologize for seeming to have neglected keeping up to date with the drilling progress in the Bethpage area. My records on the VPB status are behind. I was trying to obtain access to the completed VPB logs and geophysical results. I believe they are all being stored on a web based database, but I frankly have no clue on where or how to access. I'm mostly interested in the actual geological aspects. Can you send me the link or let me know what the current procedures are for access. Carol Stein does not have them either.

Regards

Rob Alvey
